

Denise Smith

łáʔamin (Tla'amin) Nation

Core work interests related to Solving FCB:

My core interests are food security and food sovereignty for our Nation. I also want to understand climate change and our need to adapt to meet our future needs.

Role in Solving FCB:

On the Project Team for łáʔamin (Tla'amin) Nation Case Study

April Linton

łáʔamin (Tla'amin) Nation

Core work interests related to Solving FCB:

I am interested in our Nations Food Sovereignty by ensuring that the Tla'amin Traditional Knowledge surrounding harvesting and living off the land gets transferred to our next generations. Promoting Education, support, and resources to our community by getting the Nation involved hands on in our harvesting, processing and distribution of our traditional foods that we do annually. Also updating our annual 13 moons Harvesting Calendar to match and predict how the calendar will change in the future due to climate change.

Role in Solving FCB:

On the Project Team for łáʔamin (Tla'amin) Nation Case Study

Sachiko Ouchi

(she/her/hers)

ᄆaʔamin (Tla'amin) Nation

Core work interests related to Solving FCB:

I am interested in promoting and forwarding TN's priorities for achieving a food secure Nation in an uncertain future while helping to facilitate stewardship activities in the ʔəms giŋε (traditional territory).

Role in Solving FCB:

On the Project Team for ᄆaʔamin (Tla'amin) Nation Case Study

Karen Fediuk

Core work interests related to Solving FCB:

Providing support to First Nations on their food system and well-being research priorities has been an anchor of my work over the past two decades after completing training as a dietitian and nutrition researcher. Grounded in a rights-based approach, I help assess the impacts from changes to traditional food/lifeways and develop preferred food models and success criteria for Nation well-being, in an environment that has heavily changed in the last 150 years.

For the past 15 years, I have had the privilege of working with Tla'amin Nation on harvest, nutrition and food security studies.
