

Aleah Wong

Master's student at UBC's Institute for the Oceans and Fisheries, supervised by Dr. William Cheung

Core work interests related to Solving FCB

Sustainable and equitable aquaculture systems; role of kelp aquaculture in FCB solutions; livelihood transitions in aquaculture to support FCB goals

Role in Solving FCB: For my master's thesis I am creating a trait-based framework to evaluate the aquaculture species' potential to contribute to FCB goals. I will also conduct a case study in BC to understand how kelp aquaculture contributes to sustainable livelihood transitions
